THE LED BULB

Incandescents are banned within EU CFL's will be phased out shortly (contains Mercury, a banned heavy metal)

Halogens are far less efficient than LED's, and are very hot, posing safety issues.

Quality and colour of light has improved in recent years

Energy efficiency is improving quickly (ie. Lumens per Watt value is improving)

Technology is developing quickly (ie. flexibility, more colour tones, intelligent lamps etc.)

Price is rapidly decreasing.

Average life span of 25,000 hours, that is roughly 8-10 years of reasonable use, before the efficiency decreases by more than 30% (NOT fails)

CE MARKING

The CE mark signifies that a product conforms to the requirements of relevant EEC directives.

The prime purpose of the mark is to show that the product is safe to the customer facilitating the free trading and movement of products within the EEC.

ELECTROMAGNETIC COMPATIBILITY DIRECTIVE (EMC)

The ElectroMagnetic Compatibility directive requires that the product are designed and operate so that they meet limits of electrical and magnetic interference by emission and conduction with other electrical devices.

WEEE DIRECTIVE

Waste electrical and electronic equipment (WEEE) defines requirements and responsibilities for the management of waste lighting equipment within the European Union. This places responsibility for managing waste on the producer, reseller (in cases of re-branded product) or importer of the product.

ROHS DIRECTIVE

The restriction of the use of certain hazardous substances in electrical and electronic equipment within the European Union. However certain exemptions exist including mercury in lamps, lead in the glass of fluorescent tubes and nickel cadmium in batteries for emergency lighting products.

INGRESS PROTECTION (IP) RATING

Connectors may be susceptible to ingress of foreign materials such as moisture or dust, particular in the unmated condition. The first digit defines the protection against the ingress of dust, the second digit defines the protection against the ingress of water. The table below shows IP ratings for electrical connectors.

IP67

FIRST DIGIT	SECOND DIGIT
0	No Protection against contact and ingress of objects
1	Protected against any large surface of the body, such as the back of a hand. Protected against solid objects greater than 50mm in size.
2	Protected against access to hazardous parts by a finger or similar object. Protected against solid objects greater than 12.5mm in size.
3	Protected against access to hazardous parts with a tool or thick wire. Protected against solid objects greater than 2.5mm in size.
4	Protected against access to hazardous parts with a wire, screw, etc. Protected against solid objects greater than 1mm in size.
5	Protected against access to hazardous parts. Dust protected.
6	Protected against access to hazardous parts. Dust-tight.
0	No Protection
1	Protected against water drops
2	Protected against water drops at a 15 degree angle
3	Protected against water spray at 60 degree angle
4	Protected against water splashing from any angle
5	Protected against water jets from any angle
6	Protected against powerful water jets and heavy seas
7	Protected against the effects of temporary submersion in water. Test requires 30 minutes at 1 meter depth.
8	Protected against the effects of temporary submersion. Customer specification applies and specific testing may be required.
9K	Protects against high pressures associated with steam cleaning.
