

# HAY SUSTAINABILITY PRODUCT ATTRIBUTES OVERVIEW

This document provides a comprehensive overview of all documented sustainability claims for HAY furniture. The dots in the columns indicate which specific claims apply to each product. For detailed information about these environmental certifications and initiatives, please refer to the corresponding fact sheets or consult our digital library.

# HAY SUSTAINABILITY PRODUCT ATTRIBUTES

## **NORDIC SWAN ECOLABEL AND EU ECOLABEL**

The Nordic Swan Ecolabel is the official and most recognised environmental label in the Nordics while the EU Ecolabel is the EU official voluntary label for environmental excellence. Both labels address the key environmental impacts of products throughout their entire life cycle, from raw material extraction to disposal. Selected products carry the EU Ecolabel, reflecting their commitment to sustainability. For upholstered furniture with the EU Ecolabel, only fabrics that are EU Ecolabel certified are used.

An overview of EU Ecolabel-certified fabrics can be found [here](#).

## **CO<sub>2</sub>e**

We are collecting CO<sub>2</sub>e data to pinpoint areas for improvement in our products' climate impact. This data is derived from Life Cycle Assessments (LCA), conducted in accordance with the Product Environmental Footprint (PEF) method established by the European Commission. This comprehensive approach examines the entire product life cycle – from raw material extraction to production, use, and end-of-life disposal.

## **VOC TEST**

Selected furniture items have been tested and show minimal VOC emissions, meeting the stringent standards of the SCS Indoor Advantage Gold certification. This certification ensures reduced exposure to indoor air pollution, contributing to improved air quality and a healthier environment.

## **DURABILITY TEST**

Our products undergo rigorous large-scale testing, with ongoing adjustments and enhancements to ensure optimal performance. Most products are tested by independent institutes in accordance with international standards, guaranteeing both consumer safety and quality.

## **RECYCLED CONTENT**

We are gradually increasing the use of recycled materials in our products. This shift reduces the demand for virgin raw materials, helping to conserve natural resources and minimise environmental impact.

## **BIOMASS FOAM**

As part of HAY's ongoing efforts to reduce CO<sub>2</sub>e emissions, we have replaced the fossil fuel-based polyurethane used in About A Lounge and Uchiwa chairs with an alternative polyurethane made from renewable raw materials. This change maintains the same high product quality while delivering significant CO<sub>2</sub>e reductions.

## **FSC CERTIFICATION**

The FSC™ (Forest Stewardship Council) promotes responsible forest management worldwide, ensuring that wood and paper come from responsibly managed forests and other verified sources. The majority of our wooden products are FSC™ certified, and we are dedicated to increasing the number of certified items in our collection.
