

- CARE GUIDE -

13EIGHTY

HAY

HAY's 13Eighty chair designed by Dutch designers Scholten & Baijings is aptly named after the number of tiny holes in the moulded polypropylene shell. These perforations create a characteristic aesthetic, where transparency and a play of light and shadows add to the chair's expression, while the variations in the sizes of the holes bring a sense of movement to the visual appearance. They also have a functional use in draining rainwater off when the chairs are used outdoors.

Available with or without armrests in a stackable design that features steel legs with a weather-resistant coating to make it suitable for outdoor use.

- CAUTION -

With a little care you can prolong the life of your furniture. Follow the instructions for the materials of your specific product to make sure that it stays in the best shape for as long as possible.

The information below is only intended as a general guideline. For more information on how to remove specific stains, please enquire where you bought the furniture.

- / Always remove stains quickly before they can do any permanent damage to the furniture.
- / When you move your furniture, make sure you lift it rather than pulling or pushing it to avoid damaging the floor, legs and mountings.
- / Avoid improper use such as sitting on the back or armrests, tilting the seats on their back legs, putting your feet on the furniture or standing on it.
- / Be careful not to scratch or damage the surface with sharp objects.
- / Check the status of the gliders frequently and if worn down, contact your local retailer to buy replacements. The durability of the gliders will depend on the surface the chair is placed on.
- / Minor spots of rust on the steel base are considered a natural result of general use.
- / Direct placement on a seafront can lead to corrosion.
- / Wipe off bird droppings quickly as they may lead to permanent corrosion or staining.
- / Wipe off the furniture if it is dirty or wet as this will damage the surface over time.
- / Take care not to scratch the chairs against each other when stacking them. Do not move or drag the chairs around when stacked as the weight will damage the legs.

PLASTIC / POLYPROPYLENE

Wipe with a clean cloth wrung in water or in a solution of water and a neutral detergent. Remove soap residue immediately using a clean, dry cloth. Avoid using scouring cream or scouring pads, as they may scratch the surface. Do not use cleaning products containing alcohol, as they may damage the surface.

POWDER COATED OUTDOOR STEEL

Wipe with a clean cloth wrung in water or in a solution of water and a neutral detergent. Remove soap residue immediately using a clean, dry cloth. Avoid using scouring cream or scouring pads, as they may scratch the surface. In the event of lime deposits on the surface, use a clean, damp cloth wrung in lukewarm water with one part vinegar to nine parts water and avoid scrubbing as this may scratch the surface.
